DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a mode-switching transformer, classified in class 336, subclass 200.
- II. Claims 13-18, drawn to an integrated circuit, classified in class 361, subclass 764.
- III. Claims 19-20, drawn to an electronic system, classified in class 257, subclass 531.
- IV. Claims 21-23, drawn to a method of reducing a central frequency of a transformer, classified in class 363, subclass 15.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a mode-switching transformer not using in an integrated circuit of invention II or an electronic system of invention III or in a method of invention IV; invention II has separate utility such as an integrated circuit not using the mode-switching transformer of invention I or in the electronic system of invention III or in the method of invention IV; invention III has separate utility such as the electronic system not using the mode-switching transformer of invention I or the integrated circuit of invention II or in the method invention IV; invention IV has separate utility such as the method not using the mode-switching transformer of invention I or the integrated circuit of invention II or the electronic system of invention III. See MPEP § 806.05(d).

Art Unit: 2832

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
